## Profile

---

Web Developer with experience building clean, user-focused interfaces using Nuxt.js, Vue.js, TypeScript, and SCSS, and working with Strapi in a professional environment.

Motivated to learn, collaborate, and deliver high-quality, efficient solutions.

## Experience

---

### Frontend Developer Intern – Alebat Education

Mar 2025 – June 2025

Collado Villalba, Madrid

- Developed and maintained frontend features using Vue 3 and Nuxt 3 in a production environment.
- Worked with TypeScript and SCSS to build scalable, maintainable UI components with i18n/localization support.
- Collaborated within an agile development team, following best practices and sprint workflows.
- Reviewed teammates' pull requests, applying clean code principles to ensure code quality and consistency.

## Projects

---

### Vibe Live

Twitch clone web application using the Twitch API.

- Built a Twitch-like web application using Nuxt 3, TypeScript, and SCSS, integrating the Twitch API to display live streams and channel data.
- Implemented responsive layouts and dynamic data fetching to deliver a smooth, user-focused streaming experience.

### Con lo que hay

AI-powered recipe generator web application.

- Built and deployed an AI-powered web application using Nuxt 4 and TypeScript to generate cooking recipes.
- Implemented a responsive, user-friendly interface and integrated AI-based API requests.

## Education

---
