Profile

Frontend Developer focused on Vue 3, Nuxt 4 and TypeScript, with experience building modern SPAs and delivering production-ready web applications in both team and freelance settings. Strong emphasis on component architecture, clean code, accessibility, performance and maintainability. Built and deployed a full-stack corporate website and several advanced personal projects, applying code quality tools and AI-assisted workflows to accelerate delivery and improve reliability.

Experience

Alebat Education, Frontend Developer Intern Mar 2025 – Jun 2025
Collado Villalba, Madrid

- Built 6+ reusable UI components and global composables for shared state, each with ES/EN/PT i18n integration for consistent localization.
- Implemented Partners and Product pages in Nuxt 3, extending the API service layer to expose loading/error states for consistent skeleton loaders across modules.
- Reviewed teammates' PRs applying Clean Code principles, rejecting one with critical regressions in shared components and preventing breakages in reusable UI elements.

AFR Diseño & Impresión, Frontend Developer (Freelance) — [Website](#) · [Documentation](#) Jan 2026 – May 2026
Remote

- Delivered a full-stack corporate website with 20+ pages, owning the project end-to-end from architecture to deployment.
- Built a custom Strapi backend with structured content models and secure REST API endpoints for consistent data delivery.
- Implemented a CI/CD pipeline, reducing deployment time by ~83% (from manual SSH-based deploys to fully automated releases).
- Maintained an ongoing client relationship post-launch, iterating on features and content based on evolving business requirements.

Projects

HandDraw — Gesture-Controlled Drawing App · [GitHub](#) · [Demo](#) Jan 2026

Nuxt 4, TypeScript, SCSS, MediaPipe Hands

- Built a real-time gesture-controlled drawing interface using MediaPipe Hands, achieving smooth 60 FPS interactions on desktop and mobile.
- Implemented drawing, erasing, color switching and canvas clearing via gesture detection, with a modular composables architecture and responsive UI.

Con lo que hay — AI Recipe Generator · [GitHub](#) · [Demo](#) Oct 2025

Nuxt 4, Vue 3, TypeScript, SCSS, OpenRouter AI

- Developed a multilingual AI-powered recipe generator with streaming responses and server-side API integration.
- Implemented fallback logic across multiple AI models and full ES/EN localization.

Education

IES Juan de Herrera, Higher Technician in Web Application Development Sept 2023 – Jun 2025
San Lorenzo de El Escorial, Madrid

Skills

Frontend: Vue 3, Nuxt 3, Nuxt 4, TypeScript, JavaScript (ES6+), Pinia, Vue Router, SCSS, CSS3, HTML5

APIs & integrations: REST APIs, AI model APIs (OpenRouter), MediaPipe

Backend & Headless CMS: Strapi, PHP, Java, Node.js

Tooling: Git, GitHub, ESLint, Stylelint, Prettier, Commitlint, Vercel, AI-assisted development (OpenCode agents, GitHub Copilot, ChatGPT)

Practices: Agile (Scrum/Kanban), Clean Code, SOLID, accessibility (WCAG-aware)

Languages: Spanish (native), English (B2)
