Profile

Frontend Developer focused on Vue 3, Nuxt 4 and TypeScript, with experience delivering production-ready web applications and modern responsive interfaces. Strong emphasis on component architecture, clean code, accessibility, performance and maintainability. Built and deployed a corporate website and several advanced personal projects, including AI-powered and computer vision applications. Skilled in JavaScript, HTML and CSS, and experienced leveraging AI-assisted development workflows to accelerate delivery, improve code quality and support technical decision-making.

Experience

Alebat Education, Frontend Developer Intern
Collado Villalba, Madrid

Mar 2025 – Jun 2025

- Built 6+ reusable UI components (tabs, Swiper carousel, accordions, cookie button) and global composables for shared state, UI logic and persistence in Vue 3 + TypeScript, fully integrated with ES/EN/PT i18n to improve consistency and reduce duplicated logic across the product.
- Implemented Partners and Product pages in Nuxt 3, creating their component structure and integrating custom REST API services with loading states and skeletons for smoother data rendering.
- Extended the API service layer to expose loading/error states, enabling consistent skeleton loaders and improving perceived performance across multiple modules.
- Reviewed teammates' PRs applying Clean Code principles, rejecting one with critical regressions in shared components and preventing breakages in reusable UI elements.

Projects

AFR Diseño & Impresión — Corporate Product Showcase • [Website](#) • [Documentation](#)

May 2026

Nuxt 4, Vue 3, TypeScript, SCSS, Strapi, REST API, CI/CD, Vercel, VPS

- Delivered a full-stack corporate website with 20+ pages (home, product catalog, contact, legal, support, about us).
- Built a custom Strapi backend with structured content models and secure REST API endpoints, ensuring consistent data delivery across the platform.
- Implemented a CI/CD pipeline and deployed the frontend on Vercel, configuring a VPS (Ubuntu + Nginx + PM2) for backend deployments with zero-downtime updates.

HandDraw — Gesture-Controlled Drawing App • [GitHub](#) • [Demo](#)

Jan 2026

Nuxt 4, TypeScript, SCSS, MediaPipe Hands

- Built a real-time gesture-controlled drawing interface using MediaPipe Hands, achieving smooth 60 FPS interactions on desktop and mobile.
- Implemented drawing, erasing, color switching and canvas clearing through gesture detection with a modular composables architecture.
- Designed a responsive UI optimized for real-time interactions.

Con lo que hay — AI Recipe Generator • [GitHub](#) • [Demo](#)

Oct 2025

Nuxt 4, Vue 3, TypeScript, SCSS, OpenRouter AI

- Developed a multilingual AI-powered recipe generator with streaming responses and server-side API integration.
- Implemented fallback logic across multiple AI models and full ES/EN localization.

Nuxt 3, Vue 3, TypeScript, SCSS, Twitch API

- Built a Twitch-style streaming platform with 16+ Vue components in Nuxt 3, integrating 10+ Twitch API endpoints (auth, users, streams, categories, followers) to deliver real-time data with enriched metadata and optimized error handling.
- Versioned with Git/GitHub and deployed on Vercel.

Education

IES Juan de Herrera, Higher Technician in Web Application Development
San Lorenzo de El Escorial, Madrid

Sept 2023 – Jun 2025

Skills

Frontend: Vue 3, Nuxt 3/4, TypeScript, JavaScript (ES6+), SCSS/CSS3, HTML5

State & routing: Pinia, Vue Router

APIs & integrations: REST APIs, OpenRouter AI, Twitch API, MediaPipe

Backend: Strapi, PHP, Java, Node.js

Tooling: Git, GitHub, ESLint, Stylelint, Prettier, Commitlint, Vercel, AI-assisted development (OpenCode agents, GitHub Copilot, ChatGPT)

Practices: Agile (Scrum/Kanban), Clean Code, SOLID, accessibility (WCAG-aware), i18n

Languages: Spanish (native), English (B2)
